

LEGO Robotics And Invention Camp

Ages 5-15 — No experience required!

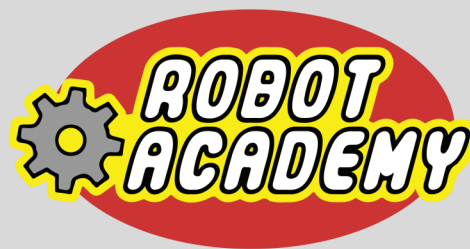

In 10-20 years, your child will be competing for a job in a society dominated by science and technology. At Robot Academy, we show kids that STEM (Science, Technology, Engineering and Math) can be fun. Our students design, build, and program LEGO robots to complete challenges and win trophies/ribbons.

Kids sit with peers in their age group and build BattleBots, maze runners or other inventions (we have several unique camps available) with expert help from world-champion LEGO robotics instructors.
